DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention of group II, claims 5-20 in Paper No. 4 is acknowledged.

Drawings

2. Figures 13-16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. OK

Claim Objections

3. Claims 5-20 are objected to because of the following informalities:
 - in line 4 of claim 5, "one" should be replaced with "a first"; ✓
 - in line in line 11 of claim 5, "implanted" should be replaced with "implant"; ✓
 - in line 4 of claim 8, "a" should be inserted between "layer" and "having"; ✓
 - in line 3 of claims 9 and 10, "ion" should be replaced with "ions";
 - in line 3 of claims 9 and 10, "is" should be replaced with "are";
 - in line 3 of claims 9 and 10, "ion-implanted" should be replaced with "implanted";
 - in line 4 of claims 9 and 10, "at" should be replaced with "in"; ✓
 - in line 3 of claim 11, "at" should be replaced with "in";
 - in line 6 of claim 11, "a" should be deleted;
 - in line 7 of claim 11, "at" should be replaced with "in";

Art Unit: 2811

- in line 3 of claim 12, "at" should be replaced with "in";
- in line 6 of claim 12, "a" should be deleted;
- in line 7 of claim 12, "at" should be replaced with "in";
- in line 3 of claims 13 and 14, "at" should be replaced with "in";
- in line 8 of claims 13 and 14, "at" should be replaced with "in";
- in line 4 of claims 15, 16, 17 and 18, "at" should be replaced with "in";
- in line 9 of claims 15, 16, 17 and 18, "at" should be replaced with "in"; and
- in line 7 of claims 19 and 20, "implanted" should be replaced with "implant".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 5-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. A few examples are given below.

The claims are replete with the terms, "reverse conductive type impurity", "first concentration reverse conductive type", "reverse conductive type source" and similar

Art Unit: 2811

terms. "Concentration reverse conductive type", "reverse conductive type" and similar terms are not art recognized language.

Claim 5 recites the limitation, "...so as to range to the first..." in line 9. The scope of the claim is vague because it is not known what is meant by the phrase.

Claim 5 recites the limitation, "...except said first gate insulation film..." in line 16. The scope of the claim is vague because the meaning of this phrase cannot be understood.

Claim 6 recites the limitation, "...so that the impurity ion-implanted is taken in the first gate insulation..." in lines 6 and 7. The scope of the claim is vague because the language is not clear.

Claim 8 recites the limitation, "...so that high impurity concentration becomes low at a region near..." in lines 9 and 10. The scope of the claim is vague because it cannot be determined if the intention is to claim a graded impurity concentration or if some of the impurities are somehow removed.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent No. 5,578,514 to Kwon et al.

Art Unit: 2811

Regarding claim 5, Kwon et al. teaches a method of making a semiconductor device comprising the steps of:

implanting an impurity of the second conductivity type (23) in a first conductivity type substrate (12);

forming a first gate insulation layer (26) by field oxidation, using a thermal treatment and diffusing the impurity of second conductivity type to form a first drain region (24);

forming a gate electrode (32) wherein the gate electrode spans the first gate insulation layer and a second gate insulation layer (30); and

forming a second conductivity type source region (34) adjacent to an end of the gate electrode and forming a second drain region (36) of the second conductivity type.

Regarding claim 6, Kwon et al. does not explicitly teach that some of the impurities from the first implant are consumed when the first gate oxide is formed. In the method taught by Kwon et al. a portion of the doped silicon is consumed during the thermal treatment to form the first gate oxide. Therefore, the oxide layer would have inherently absorbed some of the impurities.
